

## **BUSINESS ADVISORY SERVICES UPDATE IDENTIFYING MENTORS**

*"What matters is that mentors have experience that others can learn from!"* Wikipedia

Business Advisory Services is different from the traditional services that are supplied by many accounting firms and for these reasons most accountants will benefit from receiving advice from a range of people who have the necessary knowledge and experience in an area that you are contemplating specialising in.

In my case, my career includes senior partner of an accounting firm, Chief Financial Officer/Company Secretary of a listed public company, Contracted Business Advisor for an Australian government program assisting businesses to become "investment ready".

**ESS BIZTOOLS** has invited a group of mentors to assist accountants to gain a better understanding of the challenges in delivering a broader range of professional services.

Please visit [www.essbiztools.com.au](http://www.essbiztools.com.au) to view the profiles of our mentors and to familiarise yourself with the product packages that have been developed to assist accountants to deliver an outstanding range of services.

If you would like to have a conversation about these services please give me a call on 1800 232 088.

Our contact details are:

Telephone: 1800 232 088
