

Developed by ESS BIZTOOLS, ESS BIZGRANTS is a system that enables accountants to easily identify any possible government grants that are available to their clients' business.

ESS BIZGRANTS is as easy as 1,2,3....

1. Basic information is entered into the system about the client's business by answering questions relative to corporate structure, turnover, number of employees, location, expenditure etc.
2. The ESS BIZGRANTS system then identifies any possible government grants (if any) for which the client may be eligible and produces a report on the grants for you to discuss with your clients.
3. You are then able to click on to each of those identified grants and ascertain additional information. If you want to explore further you are able to click on a paper contained within ESS BIZGRANTS which will give you a more detailed description of the grant.

What's in it for Accountants?

A Better Service for Your Clients

As many small to medium businesses are missing out on government grants, accountants can offer a worthwhile referral service for their clients as to which government grants are available. This will enable you to deliver an outstanding proactive service as the "Trusted Adviser".

An Efficient Way To Identify Information

There are around 400 government grants available and to keep on going through them and knowing what they all cover is a large, tedious task. **ESS BIZGRANTS'** goal is to make this task easier and more efficient for accountants, therefore helping you offer a better quality service to the client by seeking to identify and delivering any possible grants which the SME may be eligible for.

An Opportunity To Earn Money

The accounting firm may then be able to earn fees by undertaking additional work relative to the government grant. In most cases, you will have to submit a quotation to the client and have to be accepted by the relevant government department before you can undertake the work.

There are some government grants that don't require approval from the government agency as to who is undertaking the work.

These relate mainly to:

- Research and Development
- Export Market Development

You are invited to visit www.essbizgrants.com.au and log on for a fourteen day free trial of ESS BIZGRANTS.

Upcoming FREE webinars for ESS BIZGRANTS are:

Monday, 19th October, 2015 12.00pm AEST or 1.00pm AEDT
